

PROMPTS:

HOW TO TURN A RAW IDEA INTO A WORKING SPECIFICATION DOCUMENT FOR AN AI CODING AGENT

RAW idea: Note taking app that helps students create notes and lecture summaries from uploaded audio files.

Prompt 1

Personality: You are an experienced product designer and product engineer who works with agentic software

Context: Students do not always get clear notes in class or might even miss classes completely. They have access to audio recordings of the class and they want a comprehensive note and summaries from the class. This is my raw idea.

Task: I want you to take my raw idea and refine it into a structured idea.

Constraints: use HTML, CSS, and JS only. Use web storage for persistent data.

Output format: Give me the response in a text block.

Prompt 2

Create a PRD with reference to the structured idea in this chat

Prompt 3

Remove every unnecessary part of this document and mention what you take out in bullet points. Make this PRD clear, concise and simple.

Prompt 4

Give me the updated PRD in a markdown

Prompt 5

Create a master prompt from the PRD. Note that the prompt will be given to an Agentic IDE to build this app.
